Asheville-Buncombe Technical Community College
Cumulative GPA: 4.0

Skills

Systems Design

Financial Data Management

Database Migration and Cleanup

App and Software Integrations

Strategic Operational Development

Tailored Training and Support

Economic Empowerment Strategies

Visioning and Strategic Planning

Accomplishments

Facilitated Economic Mobility

Provided free accounting and consulting services to assist a client in transitioning from residential cleaning services to a successful bodywork practice. This support led to increased income and financial stability ultimately allowing for the purchase of their first home, demonstrating the impact zero-cost services can have on individual economic empowerment.

Strategic Business Expansion During COVID-19

Delivered cohesive branding, financial tracking systems, operational procedures, software integrations, and staff materials for a music venue's new take-out taqueria during lock down in early 2020. Designed with adaptation and scalability in mind, these systems further supported the launch of two additional locations in 2021.

Business Growth Through Inclusivity

Implemented operational improvements for a construction firm, including administrative restructuring and client-focused strategies. Fostered a company culture of inclusivity in an industry suffering from misogynistic attitudes, leading to a 500% increase in gross revenues, increased wages, new positions on staff, and a threefold increase in owner salary.
